123.193				3.0 m 1st edition
126.120	617.951			

1) Accurate inspection and adjustment of injection pump is possible on an injection pump test bench only. Data sheets for the various pumps are available for workshops where such a test bench is installed.

2) Entering production starting February 1980.

3) Reference impulse verification (RIV), dynamic checking of injection timing (begin of delivery) possible.
